

# Animal Tracks

While walking through the woods you may not see any wild animals, but you might see signs that they've been there. Check the soft ground like sand, mud or snow for animal tracks. Then be a track detective! Mammals of the dog and cat families walk on four toes. Bears, raccoons, and rodents, like mice and squirrels, walk on five toes. Some animals have padded paws, some have claws, and others have hooves. These animals are all **North American Mammals**.

Can you guess which animal left which tracks? Draw a line from the animal to its tracks.

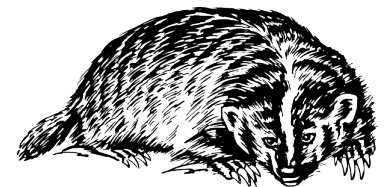

Black Bear

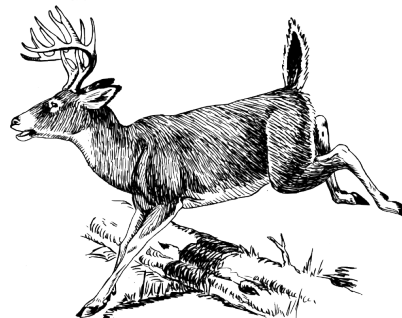

Red Fox

Raccoon

Badger

White-tailed Deer

ANSWERS: 1. Raccoon 2. White-tailed Deer 3. Black Bear 4. Red Fox 5. Badger
